Work Experience

Kyra Solutions   April 2019 – April 2020
Web Developer – 508 Compliance
Contracted to The Central Florida Expressway Authority to resolve all ADA 508 compliance issues with public-facing websites, forms, and documents.

- Updated existing .Net and WordPress code bases to implemented standard practices for assistive technologies to work seamlessly across both websites.

- Worked with programming team and Marketing Department to implement required changes, resulting in both sites being more than 95% AAA compliant.

Condensed Curriculum International   May 2019 – August 2019
Course Trainer – Front End Web Development (Part-time)
Contracted to teach 150-hour front-end web design/development course in a live classroom at the Lakeland, Florida Amazon Fulfillment Center, setting the foundation for students to take the Microsoft MTA 98-375 Front-End Web Development Certification.

- Provided coaching on uses and concepts of modern Internet technologies.

- More than half the students passing the certification test on their first attempt.

Vertex Solutions   February 2018 – February 2019
Courseware Developer
Developed web-based training (WBT) courseware for the United States military. Worked within multiple project teams to complete SCORM web-based courses using HTML5, CSS3, JavaScript and Adobe Captivate.

Trilogy Education Services   May 2018 – December 2018
Teaching Assistant – Full Stack Web Development (Part-time)
Partnered with the University of Central Florida to coach Full Stack Web Development courses.

- Provided direct hands-on training to students though coaching, example, and further one-on-one explanation. Graded and provided feedback on all assigned projects. Lead classroom discussions on core concepts of software engineering using modern web frameworks and technologies.

General Dynamics Information Technology   January 2010 – November 2017
Courseware Developer/Course Advocate
Responsible for life cycle of web-based training courseware, from initial development to deployment to Learning Management Systems.

- Used JavaScript, SQL, HTML5 and CSS3 to fulfill client needs on parallel projects.

- Administered internal and external CMS and LMS for sharing of information between General Dynamics and the United States Veteran Administration.

- For the last 12 months of employment as a Course Advocate provided a conduit for Web-based training of Veterans Administration employees; providing live assistance to national training managers. Responsibilities included administration, hosting, and reporting of live distance learning courses using web-based training modules created by General Dynamics, Microsoft Live Meeting, and Moodle.
